

HOP THE CHIP

Aim of the game

Score 7 points by dropping white chips (1 pt), gray chips (2 pts) or black chips (3 pts)!

Setting up

Place 1 white, 1 gray and 1 black chips in the white area.

Each player takes his/her chips:

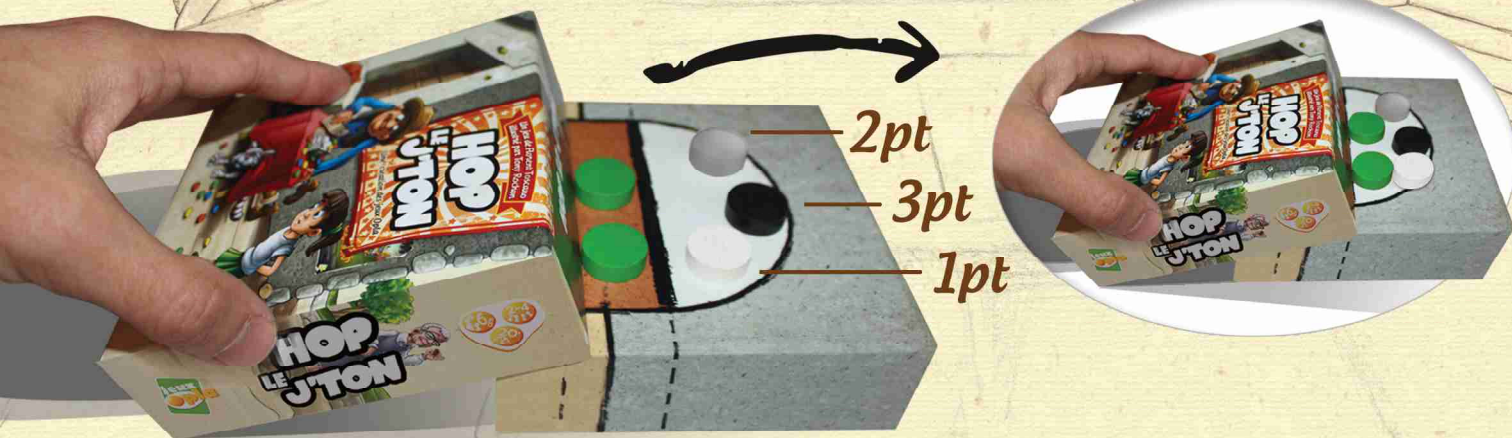

At 2 players: 14 chips of 2 colors

At 3 players: 9 chips of 1 color

At 4 players: 7 chips of 1 color

Playing the game!

Each turn you place 1, 2 or 3 of your chips in the brown area, and you push the box to the thick black line.

- If some color chips fall down from the box, each player gets his/her own ones back.

- If the white (1 pt), gray (2 pts) or black (3 pts) chips fall down, we put them in front of us to score our points, and replace them in the game by those from the stock (straddling at least on 2 other chips)!

The first one who scores 7 points wins the game !

The penalty...

Would you push too far and the chips go over the thick black line? So you must put back in the game (straddling at least on 2 other chips) one of your white, gray or black chip previously won. If you didn't have won anything before, then you put back one of your color chips.
